**Subject:** looking for RRC UIC contact

Hi Phil -

I got your name from the EPA Region 6 website as having oversight of the UIC program. I am working with Leslie Savage at the Railroad Commission to get some information about produced water volumes and management practices. She sent me some summary information but I hoped to get more details on the amount of produced water injected for enhanced recovery and to disposal wells. She is so busy that I cannot get hold of her again. I would like to speak with someone in the Class II program at the RRC. I searched the RRC website this morning and was unable to find any relevant links. I hope that you can give me the name and contact information of the RRC UIC director. Thanks.
